

Senate Bill Form #26

Senate Item:

Introduced by Senator(s):

Feb 20, 2020

Introduced on:

Sponsored by Senator(s):

The Weather Rock Bill of 2020

Title of Bill:

Recognition of an Official Hampden-Sydney "Weather Rock"

Sub-Title of Bill:

SECTION I Description

There should be an official Hampden-Sydney student Weather Rock, placed somewhere on campus. It demonstrates the sense of humor that all Hampden-Sydney men should have: Clean and informed but still funny.

SECTION II Ambiguous Terms

A Weather rock is a rock that hangs from a tripod or sits on a stand. When it rains, the top of the rock gets wet. When it snows, snow will accumulate on top of the rock. Depending on the temperature, the rock will either be warm or cold. It just demonstrates the weather in a physical way.

SECTION III Recommendations

I recommend it be a feature either in the White house front yard, or outside of Bortz Library.

SECTION IV Timeline

Within the next month, a weather rock is constructed.
It stays up.

SECTION V Laws
